

# Firstkönig Bio

## History

What would Toggenburg be without the Churfürsten. Modest yet graceful, they grace the valley with their seven peaks. The Firstkönig Bio from the Güntensperger organic cheese dairy is the crowning glory of this mountain range. In the speciality cheese dairy, the aromatic organic milk from the valley of the seven mountains is processed into an excellent, natural character cheese. The maturing time in our cheese cellar gives the Firstkönig its crowning, full-bodied taste. A real pleasure for connoisseurs.

## Taste

Softly melting, the bite passes on the tongue and the nose is tickled by a very subtle spicy scent of hay. A mild sweetness spreads across the palate and a fine buttery note nudges in the aftertaste. With its mild aroma, it is sure to delight connoisseurs large and small.

## Sales arguments

- > Mild and aromatic, the cheese classic.
- > 100% organic milk gives the cheese its natural character.
- > Modest yet unique, a crowning jewel in our product range – like the seven Churfürsten peaks crown Toggenburg.
